10. SCOPE OF WORK

10.1. INTENT

These general conditions and requirements are proposed for entering into a contract to provide nuisance wildlife removal, exclusion services, and pest extermination focusing on an integrated pest management (IPM) approach for the County of Ocean.

10.2. OBJECTIVE OF IPM

IPM involves communication, identification of the pest, and a decision process that incorporates a sound approach to prevention or eradication of the pest with mechanical, physical, cultural, biological, or the most environmentally friendly pesticide means available.

When it is determined that a pesticide must be used in order to obtain adequate control, the contractor shall employ the use of formulations and treatment techniques which minimize the amount of pesticides used and the potential exposure to people and the environment.

The contractor shall be responsible for application of pesticides according to the product label. All pesticides used by the contractor must be registered with the Environmental Protection Agency (EPA), and the State Department of Environmental Protection. Transport, handling, and use of all pesticides shall be in strict accordance with the manufacturer's label instructions and all applicable federal, state, and local laws and regulations.

The contractor will use the following pesticide use hierarchy as a guide to minimize the amount of pesticides applied as well as the potential for exposure.

- Containerized and other types of bait formulations rather than sprays shall be used for cockroach and ant control, wherever appropriate.
- Baits are considered the standard choice for non-food preparatory spaces. Baits for other insects should also be considered as they are introduced into the marketplace and their efficacy established.
- As a general rule, if effective baits are not available, liquid, aerosol, or dust formulations shall be applied only as crack and crevice treatments with application devices specifically designed for this purpose. "Crack and crevice treatment" is defined in this contract as an application in which the pesticide is only released within the crack and crevice and does not leave a deposit on exposed surfaces.

10.3. PROTECTION OF THE BUILDING AND SITE

The contractor shall, during the course of the work, take those precautions necessary to protect buildings from any damage.

10.4. USE OF THE SITE

The contractor shall confine his operations to those areas designated by the Buildings & Grounds Department, General Supervisor of Building Services at 732-929-2039. Contractor shall respond to regular service calls by scheduling an on-site initial assessment within 24 hours of notification from County.

Contractor shall maintain a 24- hour answering service and be able to schedule and perform inspections at night, on weekends, and for emergencies, as needed.

Application of pesticide liquid, aerosol, or dust to exposed surfaces, and pesticide space sprays (including fogs, mists, and ultra-low volume applications), shall be restricted to unique situations where no alternative measures when no other effective alternatives exist. In the event that these applications become necessary, a formulation with the least potential for exposure will be chosen. Such applications shall be made only to areas unoccupied at the time of application and shall remain unoccupied until the treated surfaces have dried, or longer if the label specifies a longer reentry time. The contractor and Buildings & Grounds Department, General Supervisor of Building Services will determine, on a case-by-case basis, what additional ventilation and pre-notification is needed.

10.28. INITIAL INSPECTION

The contractor shall conduct a thorough, initial inspection of each Building and Grounds listed location within ten (10) working days after the effective date of the contract. The purpose of the initial inspection is for the contractor to identify problem areas and any equipment, structural features, or management practices that are contributing to pest infestations. This initial inspection shall be at no charge to the County.

10.31. NUISANCE WILDLIFE MANAGEMENT**A. Non-Pesticide Products and Use:**

All such devices shall be concealed out of the general view and in protected areas so as not to be affected by routine cleaning and other operations. Trapping devices shall be checked regularly and disposal, as necessary, completed no later than the following day.

B. Pesticide Products and Use:

All rodenticides, regardless of packing, shall be placed either in locations not accessible to children, pets, wildlife, and domestic animals, or in EPA-approved tamper-resistant bait boxes.

10.31. NUISANCE WILDLIFE MANAGEMENT (Cont'd)**B. Pesticide Products and Use: (Cont'd)**

Frequency of bait boxes servicing shall depend upon the level of infestation. All bait boxes shall be maintained in accordance with EPA regulations and the New Jersey Pesticide Control Code, NJAC 7:30-9.5, with an emphasis on safety. The Contractor shall adhere to the following five points:

10.34. STRUCTURAL/ PROCEDURAL RECOMMENDATIONS

Structural modifications for pest control, including the application of caulk and other sealing materials will be the responsibility of the contractor. Throughout the life of this contract, the contractor shall be responsible for notifying Buildings & Grounds Department, General Supervisor of Building Services in writing about any structural, sanitary, or procedural modifications deemed necessary to eliminate pest food, water, harborage, or access.

10.35. PERFORMANCE

Monitoring: Precisely placing insect monitors which trap a portion of the pest population is the key to informing the IPM technician of areas needing attention. This helps minimize the amount of pesticides applied by focusing treatments into specific harborages with active signs of infestations.

Caulking and Sealing: IPM technicians will routinely caulk cockroach harborages instead of constantly treating them. Technicians also will inspect for and seal openings into the facility such as holes around pipes that may allow insects and rodents to enter the facility.

Insect Baits: Baiting techniques help to reduce liquid residual pesticide use by controlling many infestations before they become a major problem. If it is necessary to use a liquid product, it shall be a non-repellent product.

Insect Growth Regulators: Contractor shall utilize Insect Growth Regulators (IGRs) to break the breeding and developmental cycle of many insects. The IGRs shall be effective against cockroaches, stored product pests, fleas, ants, and many other insects.

Pheromone Traps: Contractor shall use insect pheromone traps, which contain a non-toxic glue and insect pheromone that attracts insects by luring them to the trap with its own scent.

Insect Electrocutors: These units shall be commercial grade, UL listed, and highly effective in catching and killing flying insects.

Termite Bait System: County has in place bait station that must be maintained. Sentricon, or equivalent, bait systems shall be used instead of termiticides. Billing shall be submitted per month.

Ant Bait System: County has in place bait stations that must be maintained. Perform monthly inspections on buildings as specified herein. The stations shall be monitored and bait refilled monthly. Use only bait that contains 1% orthoboric acid. Billing shall be submitted per month.

Treatment of Bed Bugs, Parasites, or any Sanitary issues: Main treatment shall consist of steam procedures and may be in conjunction with chemicals. Main treatment must be steam temperature of 200 degrees or above. Services must be done after regular business hours (after 4:30pm) on a normal business day. This treatment will be considered an emergency service and performed before the end of the same business day. No sub-contractors shall be used for this treatment; contractor must perform all aspects of the job.

10.36. SPECIAL REQUIREMENTS FOR BUILDING #19: JUSTICE COMPLEX

Monthly inspections and treatment of kitchen, laundry, stock rooms, and surrounding basement area: These inspections are for all insects and rodents, with special attention paid to roaches, ants, sewer flies and mice. After each inspection a progress report with a list of materials used must be turned in to the Buildings & Grounds Department.

Monthly, in conjunction with a bi-weekly inspection: Inspection of entire jail complex (basement, third floor, medical, fourth floor, towers, and pipe chases). These inspections are for all insects and rodents, with special attention paid toward roaches, ants, sewer flies, and mice. After each inspection a progress report with a list of materials used must be turned in to the Buildings & Grounds Department.

10.37. RECORD KEEPING

Service Calls: B&G will transmit work orders to Buildings & Grounds Department, General Supervisor of Building Services who will coordinate scheduling of all service calls. All service calls shall comply with The Pest Control work and Inspection Report forms which will be supplied by the contractor and will be used to advise the Buildings & Grounds Department, General Supervisor of Building Services of routine service requests and to document the performance of all work, including emergency work. This includes all the information on pesticide applications required by NJAC 7:30-6.8 and 7.3. Upon completion of a service visit to the building, the contractor's representative performing the service shall complete, sign and date the form, and return it to the logbook or file on the same or succeeding day of the services rendered.

The contractor shall be responsible for maintaining a pest control logbook at B&G, including labels and SDS sheets for all pesticides used in buildings, (brand names of all) and pest control devices and equipment.

Service Tickets: Contractor must provide a service ticket for each call and or inspection to the Buildings and Grounds Office located at 5 Mott Place, 239 Washington Street, Toms River, NJ. All slips must be signed and delivered in a timely manner after service is rendered but no later than 48 hrs. after work has been performed. Service ticket shall include pest identification and treatment performed.

AWARD

In order to avoid any delay in job completion, the County reserves the right to award to the two (2) lowest bidders. Work orders shall be placed with the lowest bidder first and, if the Contractor is unable to perform the work or meet the time constraints of the County, the County may then offer the job to the next low bidder. If the low bidder already has three (3) or more jobs pending completion and new work needs to be done, the County reserves the right to move to the next low bidder in order to avoid any delay in job completion.
