SPECIFICATIONS FOR COMPLETED TRAFFIC SIGNS**DESCRIPTION**

Completed signs shall consist of pressure sensitive ASTM approved facing material, Type IX and Type XI, or equal, as called for by bid, affixed on Aluminum alloy gauge .080/5052. The completed signs shall be of the shape, size, and legend and color specified by the Manual on Uniform Traffic Control Devices December 2009, or as specified by the Engineer. The retro reflective sheeting shall have a smooth surface with a distinctive interlocking diamond seal pattern and datum orientation marks visible from the face. The sheeting shall be pre-coated with a pressure sensitive adhesive backing protected by a removable liner.

GENERAL CONDITIONS**A. Effective Performance Life**

The high intensity and engineering grade reflective sheeting shall have an effective performance life of seven (7) years, except for orange sheeting, which shall have an effective performance life of five (5) years.

The reflective sheeting materials shall be considered to have performed effectively for the number of years specified, if after having been processed and applied to sign base materials according to sheeting manufacturer's recommendations for traffic control signs, the sheeting has not deteriorated due to natural causes to the extent that: 1) the sign is ineffective for its intended purpose when viewed from a vehicle, or 2) if after removal of surface dirt according to the recommendations of the sheeting manufacturer, the average nighttime intensity is less than 50 percent of that specified under "Brightness Values".

Diamond grade retro reflective sheeting material processed and applied to sign blanks in accordance with the sheeting manufacturer's recommendations shall perform effectively for a minimum of seven (7) years. The retro reflective sheeting will be considered unsatisfactory if it has deteriorated due to natural causes to the extent that the sign is ineffective for its intended purpose when viewed from a moving vehicle under normal day and night driving conditions.

B. Technical Service

Bidder's proposal shall include technical service to Ocean County with forty-eight (48) hour notice. "Technical Service" is understood to mean assistance in 1) correcting problems with pre-screened sign faces, 2) working with the aluminum sign blanks, 3) applying reflective sheeting material.

C. Sign Face Dating and Identification

All pre-screened sign faces shall have the following identifying markings screened onto their reflective surfaces, between the border stripe and the edge of the sign (or as close as possible to the edge of the sign) in block letters ¼" in height:

- The name or logo of the fabricator of the sign face
- The letters "OCED"
- The month and year of fabrication, stated numerically, e.g. 6/16 for June 2016
- The M.U.T.C.D. Code number of the sign, e.g. R1-1 for stop signs

TEST METHODS**A. Test Conditions**

Unless otherwise specified herein, all applied and unapplied test samples and specimens shall be conditioned at the standard conditions of $23 \pm 3^{\circ} \text{C}$ ($73 \pm 3^{\circ} \text{F}$) and $50 \pm 5\%$ relative humidity for 24 hours prior to testing.

GENERAL CONDITIONS (CONT'D)**B. Test Panels**

Unless otherwise specified herein, when tests are to be performed using test panels, the specimens of retro reflective material shall be applied to smooth aluminum cut from ASTM B-209 Alloy 5052-H36, 5052-H38, 5154-H38 or 6061-T6 sheets in 0.05 cm (0.020 in.), 0.10 cm (0.040 in.) or 0.16 cm (0.063 in.) thickness. The aluminum shall be degreased and lightly acid etched before the specimens are applied. The specimens shall be applied to the panels in accordance with the recommendations of the retro reflective sheeting manufacturer.

PHYSICAL REQUIREMENTS**A. Color Requirements**

Color Test – Conformance to color requirements of color specification limits shall be determined by instrumental method in accordance with ASTM E 1164 on sheeting applied to aluminum test panels. The values shall be determined on a Hunterlab Labscan 6000 0/45 Spectrocolorimeter with option CMR 559 [or approved equal 0/45 (45/0) instrument with circumferential viewing (illumination)].
