**FLY:** Trouser shall have a metal memory lock zipper. There shall be a French Fly tab closure on the inside the right fly. **WAISTBAND:** The waistband shall be constructed using the “closed method” and shall measure a minimum of 2” wide when finished. The hook and eye shall be reinforced with 7/8” non-woven stay tape that is anchored with the topstitching through and through to the top of the waistband (bartacks in place of topstitching shall be cause for rejection). In addition to the stitching of the waistband when it is set onto the trouser, the waistband must also be topstitched below the waistband seam through the waistband curtain for added strength. The back center seam of the trouser is to be finished to allow for alterations (with ample basic fabric and waistband curtain material to allow trouser size to be increased at least one size).
