L.E.D. TRAFFIC SIGNALS AND COMPONENTS

General: The Design shall permit the user to interchange all of the components in the 12 inch aluminum signal head with all of the components in the 12 inch polycarbonate signal head. Included in the design is the same capability to interchange 8 inch aluminum signal heads with 8 inch polycarbonate signal heads. Signals shall be 3-sections (red, yellow & green)

Housing: Polycarbonate injection molded in one piece. To provide strength and positive locking when using the self-locking fittings, each housing is molded with a 5 inch serrated boss and reinforcing ribs top and bottom. Also on top and bottom an opening to accept standard 1 ½ inch zinc pipe hardware. Polycarbonate housings will have four additional knockout locations to allow use of four 10-32 x 1 ½ inch zinc plated machine screws as an additional means of coupling sections. All housings will have a cast boss provided for mounting a 5 position terminal strip. The words red, amber, green, are cast next to each boss to identify socket lead wire attachment. The modular design permits coupling of various 8 and 12 inch signal configurations.

Door and Mounting: Polycarbonate injection molded with two integrated hinge lugs mounted to the housing with two stainless steel hinge pins. Positive latching is achieved with stainless steel eyebolts and wingnut assemblies. A moisture proof and dust tight seal is assured with an E.P.D.M. rubber gasket fitted into the gasket channel cast in the perimeter of the door. On polycarbonate signal doors four metal threaded inserts are molded in for added strength to the visor attachment screws.

Lens Standard L.E.D.s, (red, amber, green) shall meet the latest ITE Requirements. Lenses fit into specially extruded E.P.D.M. gaskets which are placed into the door with four aluminum lens clips and stainless steel screws, to create a moisture and dust proof seal.

Optical: The entire design permits a positive contact of the door, lens, and assemblies which create a moisture and dust tight atmosphere.

Terminal Block: Each signal is provided with a 5 section ten terminal barrier strip; one side with a quick disconnect terminal for socket leads. The opposite with a screw clamp terminal for field wiring.

Visors: Visors mount with 4 stainless steel screws to the face of the door. "Twist on type" full circle, tunnel, angle, or cap visors as specified at time of purchase order. Polycarbonate visors shall be one piece molded and shall have twist-on attaching ears to match aluminum visors.
